SUMMARY

Full-stack developer (React, TypeScript, Node.js, MySQL, MongoDB) who builds from the architecture down: maps the data flow first, then builds in layers – client, API, DB – and wires AI into systems as tools and agents. Focus areas: RAG, MCP servers, AI agents.

SKILLS

Frontend: React · TypeScript · JavaScript · Redux · React Hook Form · Vite · HTML/CSS
Backend: Node.js · Express · REST APIs · Zod · JWT · Firebase Auth
Databases: MySQL · MongoDB · Mongoose
AI & Tooling: RAG · MCP servers · AI agents · OpenAI API · Prompt engineering
DevOps & Tools: Docker · Git · GitHub · GitHub Pages · Firebase · ngrok · Postman
Languages: Hebrew (fluent) · English (high level) · Russian (basic)

PROJECTS

CryptoTracker | Live crypto price tracker with smart caching and global state management

[Live](#) | [GitHub](#)

React · Redux · TypeScript · CoinGecko API · MCP

- Built a smart caching system: 2 API calls at boot, 1 poll/min, zero calls on user interaction
- Designed global state management with Redux: every read comes from the store, not the API

simple-url-scraper | URL scraper library, published as an npm package

[npm](#)

Node · TypeScript

- Built a simple interface: give it a URL, get back its metadata, headers and links
- Designed it as a tool for AI agents to call

VacationTracker | Express app with admin CRUD and AI recommendations per destination

[GitHub](#)

Node · Express 5 · TypeScript · MongoDB (Mongoose) · MCP · OpenAI

- Built role-based auth (user/admin) with chained middlewares that gate admin-only CRUD
- Exposed DB queries as MCP tools via express-mcp-handler; AI layer returns structured JSON per destination

freelance-price-proposal | Claude skill that turns a freelancer's raw notes into a price proposal

[GitHub](#)

Markdown skill · prompt engineering

- Designed it to output a client-ready proposal plus a private list of details the freelancer forgot
- Built it from real proposals gathered from working freelancers; works in any language and profession

EDUCATION

Full Stack & AI Development Track | John Bryce Academy

Mar 2026 – Present

- Intensive full-stack program integrated with AI: RAG pipelines, MCP servers, AI agents, OpenAI API
- Emphasis on clean architecture, layered backends and state management

MILITARY SERVICE

Field Intelligence Combat Officer & Operations Officer | Israel Defense Forces (IDF)

Feb 2023 – Feb 2025

Led a platoon of combat soldiers under extreme pressure, making critical calls on the fly. Ran the operations room with clear multi-channel communication and full accountability for task management.
